

DL workshop

Ideation

Core idea areas

- Evaluation Metrics
- Co-creativity
- Holes in the latent space
- When we don't have big data
- Personalization

Breakout ideas

- Semi-autonomous co-creative partner.
- Learning a latent space by definition, learns the training set. How can we creatively escape from the data set?
- Build new architectures of co-creation centered on human experience.
- Measure how the human is doing in co-creative systems.
- Creative Systems with explainable component(s).
